

CJD 8000/CC

What is in it for your bank?

Be a technology leader

Be the first to offer on-demand cheque purchase in your self-service banking branches

Reduce chequebook issuance

Customers only purchase cheques when needed. Otherwise, encourage the usage of e-payments instead

Significant savings

Do not need to print and distribute free chequebooks to all your customers, reduce the number of tellers serving customers

Automation

Replace routine over-the-counter processes, tellers achieve higher productivity in other revenue generating areas

New source of revenue

Levy a fee on every cheque purchased by your customers

CJD
8000/CC

Redefined convenience for your banking customers

Time is of the essence in our busy schedules today, and we understand the need to make your banking services as conveniently accessible as possible. That is why we created the self-service Rototype Cashier's Cheque Dispenser to enable your customers to purchase their cashier's cheques on a 24/7 basis.

Multi-channel cheque request via mobile and online banking offers unprecedented ease for your customers. Simply scan the QR code they receive on their mobile phone to print and collect their cheques at the nearest cashier's cheque dispensing kiosk.

Enable your customers to purchase cheques for others, by forwarding the QR code to the recipient for collection at any cashier's cheque dispensing kiosk.

Extend your reach even to your customers who do not have checking accounts by enabling them to purchase a cheque easily using their ATM card – the amount debited from their savings account afterward.
